

DIY: SLiME RECIPE

iNGREDIENTS

- Liquid glue → 1/4 cup
- Water → 1 tbsp
- Liquid detergent (Tide) → 1/4 cup
- Optional: Food coloring → 5 drops

STEPS OF THE RECIPE

STEP #1

Pour **1/4CUP** glue into a large bowl. Add **1Tbsp** water and stir until combined.

STEP #2

Add **5DROPS** of food coloring and mix well. Mix until uniformly distributed.

STEP #3

Add **1/4CUP** of liquid detergent and mix until thick and slimy. Then squeeze the slime with your hands. If it is still sticky, add another **Tbsp** of detergent. This step is important because it makes sure there's no unmixed glue hiding in the center of your slime ball. If slime is still sticky, add additional detergent, a little bit at a time, and mix until not sticky anymore. Most batches will use almost all of the detergent. Store slime in a glass or plastic container with a lid for up to one week.
