

Survey FAVOURITES EDITION

First, you are going to collect data by creating a survey. You must decide 5 things you believe people love the most for your survey.

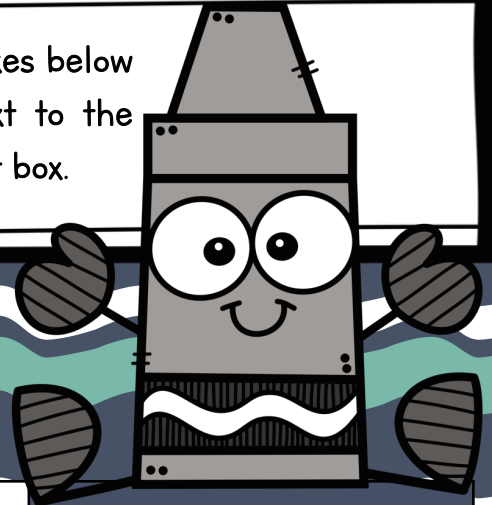

Next, you will ask students from English intensive classes what they love most. They must choose only one. You will tally your results on the table at the verso of this page.

Then, you will use the data collected to create a diagram of your choice. (p. 3). Make it clean.

Finally, you will write a short paragraph to explain your results. Which one is the favourite from all students? Which one is the least favourite? What are the percentages for each choices provided?

Write each of your choices from your survey in the boxes below then tally the results of your survey in the box next to the choice. Write the total amount of tally marks in the last box.
